## NEW PRODUCT

### BIO HCG

B2020

#### PRODUCT DESCRIPTION

**Bio HCG** or **Human chorionic gonadotropin** is a **glycoprotein hormone** produced in pregnancy that is made by the developing **embryo** after **conception** and later by the **syncytiotrophoblast** (part of the placenta) according to *Wikipedia*.

#### FUNCTION AND PHYSIOLOGICAL ACTIONS

British endocrinologist A.T.W. **Simeons'** while studying pregnant women in India on a calorie-deficient diet, and "fat boys" with pituitary problems treated with low-dose hCG, claimed that both **lost fat** rather than lean (muscle) tissue. He reasoned that hCG must be programming the hypothalamus by promoting mobilization and consumption of *abnormal, excessive* adipose deposits. **Simeons**, practicing at Salvator Mundi International Hospital in Rome, Italy, recommended low-dose daily hCG injections (125 IU) in combination with a customized low-calorie (high-protein, low-carbohydrate/fat) diet had loss of adipose tissue without loss of lean tissue. Simeons explained that "hCG acts exclusively at a diencephalic level and there brings about a considerable increase in the functional capacity of all those centers which are working at maximum capacity."

There are **three types of fat** reserves in the human body: structural, normal, and abnormal. Structural and normal fat supplies are necessary to bodily functions. The third type is called **abnormal fat** and is fat that has been stored by the body yet is not available when there is a nutritional deficit. It is understood that hCG allows the hypothalamus to mobilize the abnormal fat in the body out of its storage locations so that it is available for use by the body.

This process by the hypothalamus will cause the release of stored **toxins** in the adipose tissue which were formerly bound up. **This should result in increased energy, decreased inflammation, clearer skin, and improved digestion, etc.**

This review does not recommend any particular diet plan. Before undertaking any type of diet program please consult a health care professional.

#### INGREDIENTS:

Human Chorionic Gonadatropin (HCG) 12X, 30X, 60X, Reversed Osmosis Water, 20% Ethanol Alcohol.

#### INDICATIONS AND USAGE

**Bio HCG** may be a useful homeopathic adjunct for individuals who wish to support the body's metabolic function to help maintain health.

Positive side effects may include increased energy, decreased inflammation, clearer skin, improved digestion.

#### SUGGESTED DOSAGE

Adults take 5 – 10 drops 3 – 6 times per day under tongue 30 minutes before meals or per day as directed by a health care professional.

#### SIDE EFFECTS

No direct negative side effects. However, as with any form of detoxification, mild headaches may be experienced. Health care physicians may add Lymph I or II and must have the patient drink plenty of water.

#### HOW SUPPLIED

Homeopathic drops.

#### NOTE:

\*Before undertaking any type of diet program please consult a health care professional.
